

VC36M

Power and versatility for all industries

The **VC36M** is a single-phase industrial vacuum cleaner equipped with 3 powerful motors and a filter cleaning system [filter shaker] that guarantee consistent, high-level performance.

Its robust structure and mobile dust container with wheels facilitate the removal and handling of waste, even in demanding jobs. It also features a large accessory compartment, allowing you to always have everything you need for cleaning operations at hand.

The large filtration area and integrated filter shaker ensure long-lasting operation with efficient suction. The vacuum gauge on the head allows you to easily check the condition of the filter to maintain maximum performance at all times.

Applications

VC36M is a versatile piece of equipment designed for virtually any industrial sector, including:

- Food industry.
- Chemical and pharmaceutical industry.
- Metallurgy and machining.
- Maintenance of industrial facilities and plants.
- Construction and public works.
- Workshops and logistics.
