

# FHP2

Portable satellite  
cleaning equipment

## Foam generator for industrial cleaning and disinfection

FHP2 is a professional foam generator designed for cleaning and disinfection tasks in industrial environments. This **compact and lightweight equipment** allows dense active foam to be projected over long distances, **ideal for covering large surfaces**.

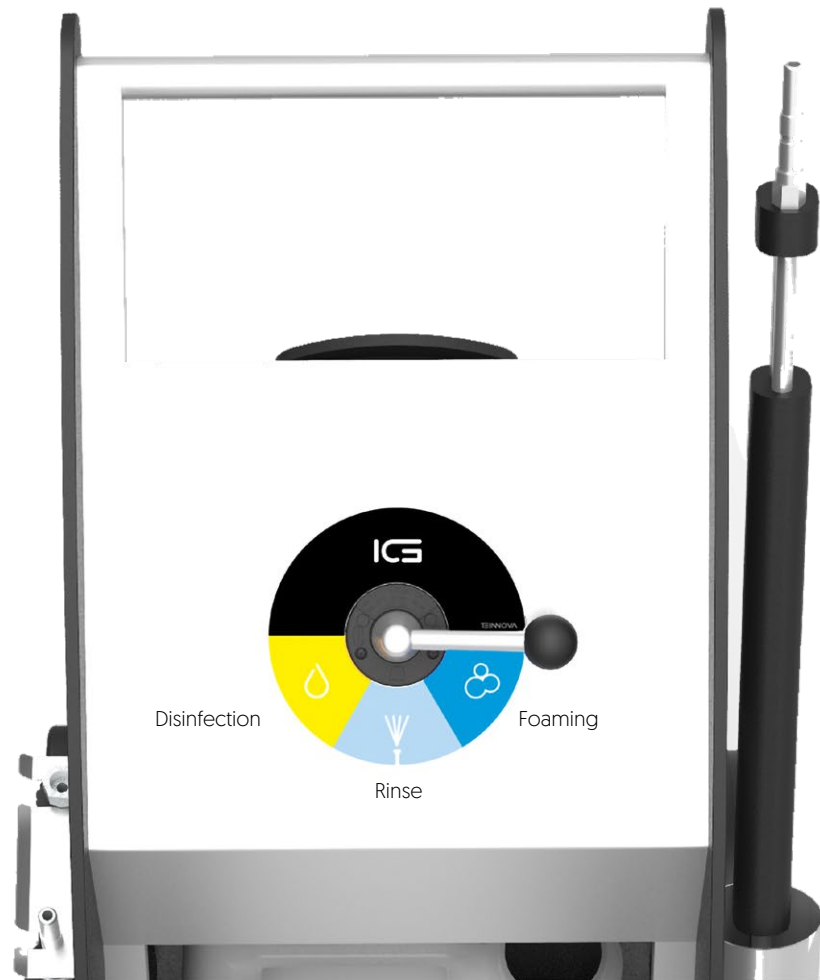

### Power and efficiency without an electrical connection or compressed air

FHP2 requires connection to the workplace's high-pressure water supply. Its ergonomic design includes compartments for two containers: one for degreaser and one for disinfectant. No electrical connection or compressed air required.

## Key features

- Operates via connection to a high-pressure water supply.
- Long-range active foam projection.
- Selector for three operating modes: cleaning, disinfection and rinsing.
- Lightweight structure, very easy to transport within the working environment.
- Integrated compartments to hold two chemical containers (degreaser and disinfectant).
- Intuitive design, very easy for the operator to use.

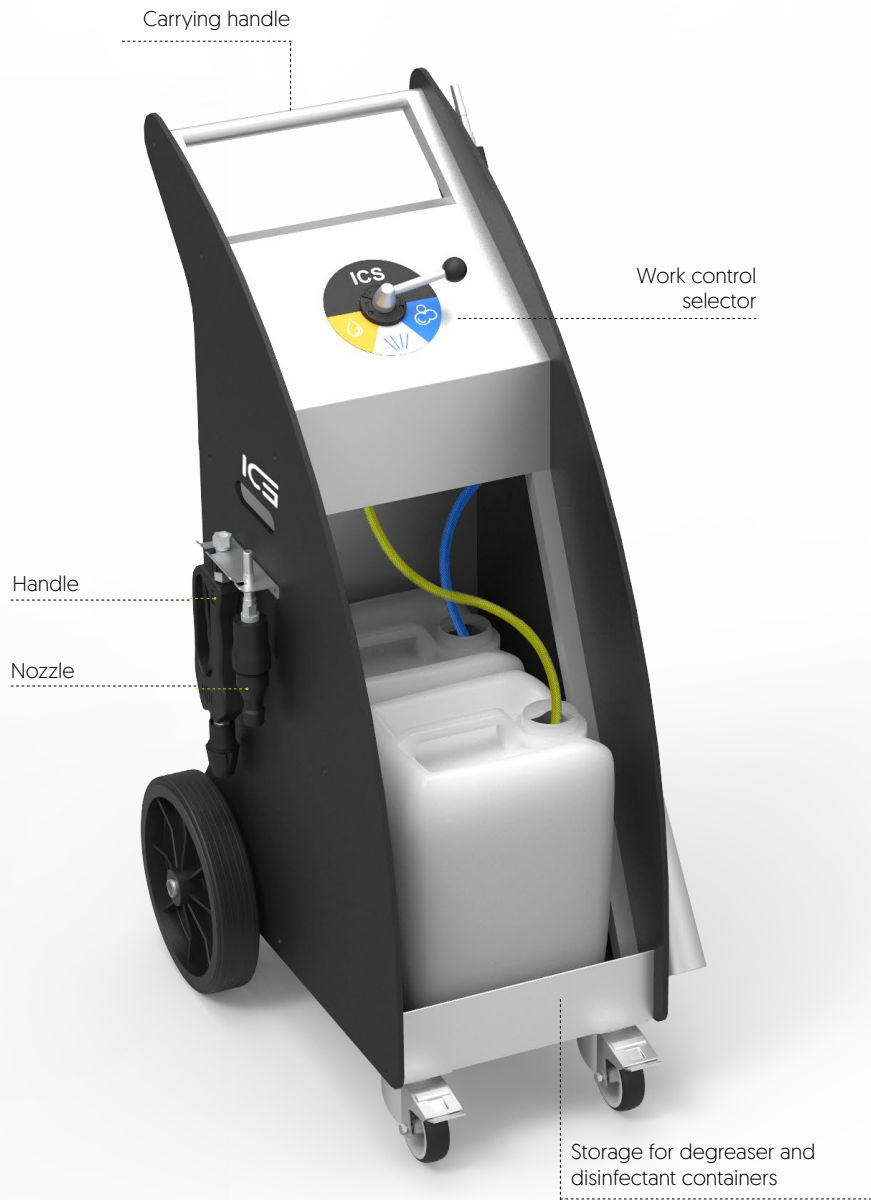

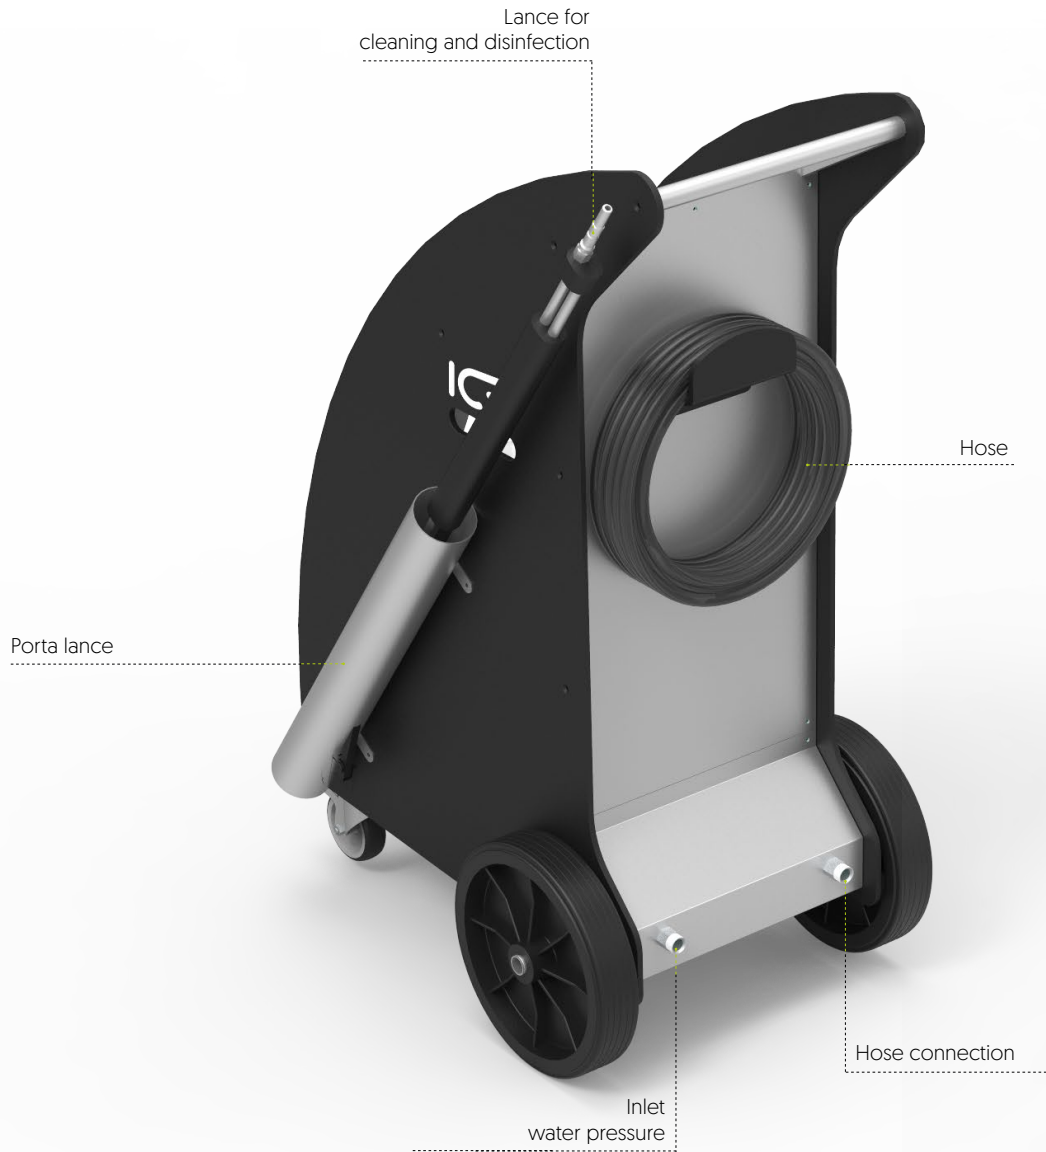

## Competitive advantages

- Maximum portability and lightness.
- Quick change between cleaning, disinfection and rinsing functions.
- Ideal for large areas with a pressurised water supply available.
- Facilitates professional cleaning work with compact equipment.
- Reduces operator effort and improves productivity.

TECHNICAL SPECIFICATIONS

|                                |                                                 |
|--------------------------------|-------------------------------------------------|
| Minimum hydraulic power supply | 6 l/min / 80 bar                                |
| Maximum hydraulic power        | 60 l/min / 350 bar                              |
| Hose length                    | 32,80 ft/10 m                                   |
| Control panel                  | 3-position manual selector                      |
| Working modes                  | Foamed, disinfected and high-pressure rinsed    |
| Accommodation for chemists     | 2 jerrycans of 6,60 gallons                     |
| Structure material             | Stainless steel and HDPE                        |
| Dimensions [L x W x H]         | 765 x 540 x 1180 mm / 30.11 x 21.25 x 46.4 inch |
| Empty weight                   | 30 kg / 66 lb                                   |
